Proudly brings to teachers, therapists and parents a workshop in

**Kids & Computers: What’s out there?**

Two important issues face us as we move further into digital learning and classrooms:

1. It is necessary to acknowledge the presence of a simultaneous virtual reality in which our neomillennial learners exist: an online world that is as real and dangerous as the physical one we live in. While we enjoy the connectivity of technology, we fear our children’s online vulnerability.

2. The exciting, though sometimes overwhelming, side of computer technology is the speed at which it is continuously developing. Finding the best ways to support children experiencing learning difficulties can be a daunting task in this digital age. Aided by the right technology, learners are able to achieve their potential and experience opportunities that they would otherwise miss out on.

These pertinent issues in mind, we are thrilled to present **Mark Dawe**, tackling the dangers of social media, and **Danny Havenga** to navigate the latest in digital learning support.

### Date: Saturday, 29 August 2015

**Time:**

- 8:30 – 9:00 Registration
- 9:00 Talk starts... finishing time approximately 11.30
- 10:00 Tea and AGM (± 20 minutes)

**Cost:**

- SAALED members: R 80 pp
- Non-SAALED members: R100 pp
- Students: R40 pp
- See registration forms for details

**Venue:** Thomas More College

**Address:** 15 Sykes Rd

### Mark Dawe - The Dangers of Social Media

**Mark Dawe** has been in the IT industry for 15 years, starting as a software developer followed by running his own IT Consulting company for SMEs. 8 years ago he took a job as a technician at TMC, where he now runs the department. Here he has had to deal with the dangers of kids being online and teaching them how to be safe. This culminated in putting together a series of talks aimed at educating parents and children what is currently out there, how it works and staying safe.

### Danny Havenga - “Imagine, Innovate, Inspire”

**Danny Havenga** returned to SA from the UK to start Microlink South Africa with the aim of developing disability awareness and providing the best equipment and support the industry has to offer. Also having Dyslexia, he has made it his personal aim to discover and distribute the best assistive technology solutions to those who need it most.

Danny’s presentation will include:

- What is Assistive Technology
- Empower all children to achieve their true potential using the technology
- Live demo of the assistive technology
- Explain what software is available and FREE software on the market
- Q&A session

We look forward to sharing an interesting and informative morning together!
Kids & Computers: 29 August 2015

Registration Form: INDIVIDUAL REGISTRATION

Registration type: □ Member R80  □ Non-member R100  □ Student R40

(please tick)

Please print clearly using block letters

Name & Surname: ____________________________________________

Membership number: ____________________________ (if applicable)

School: ____________________________________________

Fax: (____) ____________________________________________
